**G7 EQUINE INFLUENZA**

**G7.1 Valid Certificates - Vaccination Procedure**

Each horse must have a valid vaccination certificate, which undeniably relates to that horse, completed, signed and stamped on each line by a veterinary surgeon, who is not the owner of the animal. It must state that the horse has received two injections for primary vaccination against Equine Influenza given no less than 21 days and no more than 92 days apart. (Only these first two injections need to have been given before the horse may compete). In addition a first booster injection must be given no less than 150 days and no more than 215 days after the second injection of the primary vaccination. Subsequently, booster injections must be given at intervals of not more than 1 year apart, commencing after the first booster injection. None of these injections must have been given within the preceding 7 days, including the day of the competition or entry into the competition stables.

**G7.2 Producing Vaccination Certificates on Demand**

The vaccination certificate must, under penalty of elimination, accompany the horse to all official competitions (See Rule G1.1) and the competitor is responsible for producing it on demand. See also Rule G7.5 below.
